DETAILED ACTION***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7 and 18 of U.S. Patent No. 6,757,286. Although the conflicting claims are not identical, they are not patentably distinct from each other because:

With regard to claims 1 and 7, the difference between claim 1 and 7 of the instant Application and the claims 1 and 18 of the Patent is that claims 1 and 7 do not specify that the tag allocation request(s) contain a logical group identifier.

However, it would have been obvious to an ordinary person of skill in the art, at the time the invention was made to eliminate the virtual group identifier parameter from the tag allocation request(s) so that configuring of network connection method can be applied to networks other than V-LAN networks.

Art Unit: 2662

With regard to claims 2-6, 8-12, claims 2-6, 8-12 have similar scope of respective claims 2-7 of the Patent, thus they are subject to the same rejection above.
